TABLE OF REFERENCES ACCORDING TO THE U.D.C.

INDEX DES NOTICES CLASSÉES SELON LA C.D.U.

Readers will find under the following subject-headings (marked with their appropriate U.D.C. figure-symbols) the relevant number for each item:

On trouvera ci-dessous un numéro d'ordre pour chaque article classé sous les grandes rubriques de la C.D.U.

0. *General reference works; librarianship / Ouvrages généraux de référence; bibliothéconomie:* 1, 2, 3, 5, 6, 9, 10, 11, 12, 13, 17, 18, 19, 20, 21, 25, 27, 47, 56.
1. *Philosophy; ethics / Philosophie; morale:* 38, 42, 56, 65.
2. *Religion; theology / Religion; théologie;* 53, 56, 65.
3. *Social sciences / Sciences sociales:* 4, 9, 14, 15, 16, 22, 26, 27, 29, 30, 31, 33, 34, 37, 39, 40, 41, 43, 45, 47, 48, 50, 51, 52, 56, 61, 65, 66.
4. *Philology; languages / Philologie; langues:* 24, 44, 53, 56.
5. *Pure science / Sciences pures:* 5, 28, 33, 34, 35, 36, 50, 56, 58, 61, 62, 67.
6. *Applied science and useful arts / Sciences appliquées et arts utiles:* 12, 16, 23, 33, 41, 43, 47, 49, 56, 58, 60, 61, 62.

61. *Medicine / Médecine:* 32, 33, 36, 39, 47, 54, 56, 61, 64.

7. *Fine arts and recreation / Beaux-arts et récréation:* 7, 8, 18, 19, 42, 47, 51, 55, 56.
8. *Literature / Belles-lettres et littérature:* 34, 38, 42, 44, 47, 51, 55, 56.
9. *Geography and travel; history and archaeology; biography and genealogy / Géographie et voyages; histoire et archéologie; biographie et généalogie:* 27, 29, 31, 34, 38, 41, 46, 51, 56, 57, 59, 60, 63, 65.

UNESCO BULLETIN FOR LIBRARIES

VOL. VI, NO. 1 JANUARY 1952

NEW PRESENTATION OF *UNESCO BULLETIN FOR LIBRARIES* IN 1952 (1)

Beginning with the present issue, certain changes are being made in the production and distribution of the *Bulletin* in order to make a number of economies.

The greatest change that will be noticed by readers is the position of the French and English parts of the *Bulletin;* instead of appearing on alternate pages as previously, the English part is separately paged and follows the French part. The new arrangement permits the printing of a separate edition in English, which is being distributed to countries where the bi-lingual edition is not necessary. Readers in the United States of America, Great Britain and certain other countries will be receiving only this English section. The chapters listing publications wanted, exchanges and free distribution offers remain in bi-lingual form and are to be found in the last pages of each number.

Advantage is being taken of rapid methods of communication to print part of the English edition in India, for distribution to libraries and readers in South East Asia, Japan, China and the Pacific Area. By this means a considerable saving will be made in the time previously required for distribution.

During the year four double numbers (February/March, May/June, August/September and November/December) will appear. These double numbers will enable the *Bulletin* to publish longer articles which will be of greater technical value than hitherto. In particular, during 1952, a series of articles will appear on microfilm equipment—readers, cameras, etc.—and developments in the field of documentary reproduction.

All these changes have been made in accordance with suggestions received from libraries throughout the world. By these various means it is hoped to make the *Bulletin* of increasing usefulness to the Member States of Unesco and to the thousands of libraries and individuals whose needs it is designed to serve.

EIGHTEENTH INTERNATIONAL CONGRESS OF THE INTERNATIONAL FEDERATION FOR DOCUMENTATION (2)

Rome, September 1951

The World Conference of the International Federation for Documentation held in Rome from 15 to 21 September was the first occasion in three years for an international general meeting of librarians and documentation specialists. Over 350 persons from 31 countries attended the Eighteenth International Congress of the Federation, which was held at the University of Rome in the building of the National Research Council.

Before the Congress the following principal subjects had been selected as the topics for discussion:

I. Application of the Universal Decimal Classification.
II. Documentary reproduction methods and mechanical selection devices.
III. Bibliography and abstracting.

IV. Auxiliary publications.
V. Training of documentalists.
VI. General problems of classification.
VII. Linguistic problems and terminology.

The rapporteurs for the committees appointed before the Conference to study these questions were as follows: Section I, G. A. Lloyd (U.K.); Section II, Dr. M. O. Lee (U.S.A.); Section III, Dr. J. F. Smith (U.S.A.); Section IV, Dr. P. Bourgeois (Switzerland); Section V, Mme. S. Briet (France); Section VI, Dr. S. R. Ranganathan (India); Section VII, Dr. E. Wuester (Austria).

As a contribution to the discussions, the FID had accepted and distributed to all participants individual papers dealing with the above discussion topics. By the opening of the Congress, 113 papers in all had been circulated.

At the same time, from 15 to 21 September, an International Exhibition of Technical Devices for Documentation was held in the building of the Institute of Mathematics at the University of Rome. There were more than 30 exhibits from six countries and from Unesco; the devices exhibited included filing, duplicating, photographing, printing and mechanical selection equipment.

The Conference and the Exhibition opened jointly on 16 September. Working sessions of the Conference sections were held for a full week and plenary meetings took place on 21 September, the last day of the Conference. At the plenary meetings the recommendations submitted by the vaious sections were adopted.

The following are among the principal points covered in the recommendations from each section:

I. APPLICATION OF THE UNIVERSAL DECIMAL CLASSIFICATION (UDC)

(1) Recognizing the importance of having in each country one (and only one) UDC authority responsible for publicizing and explaining the principles and practice of the UDC, the Conference recommended that each national section of the FID should take steps immediately, if it had not already done so, to set up a UDC sub-section.

(2) Each national UDC committee should co-operate immediately with the FID secretariat in carrying out the following tasks:

(a) Compiling and circulating as widely as possible an accurate and up-to-date list of UDC users;

(b) Securing the widest possible distribution of the new cumulative "Extensions and Corrections", to the UDC which are to be regarded as the official (authorized) extensions to the printed editions;

(c) Preparing a short edition based on the latest available Dutch *Verkorte Uitgave*, which is to be regarded as the standard abridged edition;

(d) Actively assisting in the revision of specific UDC sections, with special reference to the preparation of the 4th (English) and 5th (French) edition;

(e) Exercising the utmost vigilance with respect to unauthorized editions, i.e. unregistered editions bearing no FID publication number; and taking all necessary measures to prevent the distribution of unauthorized editions.

Further resolutions dealt with such matters as multilingual editions of the UDC, their notation and revision.

II. DOCUMENTARY REPRODUCTION METHODS AND MECHANICAL SELECTION DEVICES

(1) Through FID, further surveys and experimental determination of the use of documentary reproduction by microcopy methods should, if possible, be made by existing research organizations. Advice to users as to other technical methods should be offered.

(2) The Council of the FID with the advice of its Committee on Documentary Reproduction, should prepare and submit to Unesco by January 1952 a plan for study and research in the format and dimension of microcopies with a view to standardization and as a contribution to the improvement in reading apparatus.

(3) Taking into account the work of the Technical Committee 46 of the International Standards Organization (ISO/TC 46) defining terminology for documentary reproduction processes and the use of the terms *microphotography* and *photomicrography*, the Conference recommended the use of the terms: *(a)* microcopy; *(b)* microfilm; *(c)* microfiche; *(d)* microcard. In addition it recommended the term *microfiche* be reserved for sheet microfilm and the term *microcard* for opaque cards.

III. BIBLIOGRAPHY AND ABSTRACTING

The Conference recommended that:

(1) The FID should approve in principle and adopt as its own policy fullest co-operation with the Unesco International Advisory Committee on Bibliography and should participate as appropriate in the work of any committee of experts which may be set up to forward its work;

(2) A standard for bibliographic citations should be drafted by ISO/TC 46 in two parts:

(a) A simple standard for citations, intended only to provide sufficient identification of the original reference. This standard would serve in quoting references, for example, by authors of scientific papers;

(b) A more elaborate standard, following accepted rules of library practice, for fuller bibliographical description of a reference. This standard would be a guide in compilation of bibliographies, including national bibliographies and abstracting journals.

(3) ISO/TC 46 should examine whether it is possible and desirable to include on its agenda the standardization of abstracts, in liaison with the organizations concerned, including national and international committees on abstracting. This standardization should include in particular the bibliographical presentation and the format of the abstracts.

IV. AUXILIARY PUBLICATIONS

In view particularly of the present inability of many institutions to print doctoral theses it was recommended:

(1) That universities and scientific institutions be urged to have those academic writings they consider important published or reproduced by an appropriate process in number sufficient for the needs of university exchanges, wherever such exchanges form a regular part of the university's policy;

(2) That other scholarly productions, existing only in manuscript form, be listed in appropriate analytical bibliographies, with indication of the depository library or documentation centre able to supply copies upon demand;

(3) That exchanges of scholarly documents among universities should not be based upon the monetary value of the documents.

V. TRAINING OF DOCUMENTALISTS

The resolutions presented by this section took into account those submitted to the Seventeenth Session of the International Committee of IFLA on 14 September (see pages E 5-6), which were endorsed by the section. The following were also presented:

(1) That the Joint Committee should invite Governments or responsible authorities to include in the programmes of general or specialized education the study of documentation, its aims, use and techniques, appeal to the press and industrial circles, and make use of educational documentary films concerning the profession;

(2) That the theoretical training of documentalists should be supplemented by practical training abroad;

(3) That FID should authorize the establishment of a permanent sub-committee of those responsible for the training of documentalists; the sub-committee would be instructed to compare experiments made in the field and to prepare standard programmes of education at the various levels by written consultations and by the holding of a conference, preferably at Copenhagen in 1952;

(4) That FID should invite its national committees to have documentation officially recognized as an independent profession and prepare draft statutes prescribing the conditions for the exercise of this profession, with a view to their comparison at an international conference.

VI. GENERAL PROBLEMS OF CLASSIFICATION

The committee dealing with general problems of classification hopes that a statistical study will be made of the different systems of classification used in libraries, documentation centres, public administration services and archives.

Consiglio Nazionale delle Ricerche, Rome, meeting place of the 18th International Conference of the FID.

Le Consiglio Nazionale delle Ricerche, Rome, où s'est tenue la XVIIIe Conférence internationale de la F.I.D.
Photo: Publifoto.

This study should also relate to the notations and technical methods used in the various systems.

The report should contain suggestions concerning the possible co-ordination of these systems.

VII. LINGUISTIC PROBLEMS AND TERMINOLOGY

In view of the fact that reliable specialized vocabularies now available only cover a small part of all technical subjects and languages, various recommendations were put forward by this section on the means of producing further vocabularies.

Agreement should be reached on unified and standardized principles and directives concerning details which are independent of both subject and language, such as form of arrangement of the vocabularies and method of compilation.

Co-ordination of the work should be allocated among the existing international organizations. The following assignment was recommended:

(1) Standardization of terminological and lexicographical principles—ISO;
(2) Production of terminological bibliographies and directories of terminological organizations—Unesco;
(3) Production of bibliographies of classifications and of directories of organizations dealing with classification—FID.

The exact text of all the resolutions will be sent for approval to the national members of the International Federation for Documentation.

At the closing plenary meeting it was announced that Mr. Arne Møller of Denmark had been elected President of the Federation. It was also announced that the 1952 meeting of the Federation would take the form of a restricted conference in Copenhagen.

SEVENTEENTH SESSION OF IFLA INTERNATIONAL LIBRARY COMMITTEE (3)

Rome, September 1951

The International Federation of Library Associations held the Seventeenth Session of its International Library Committee from 12 to 14 September 1951 in Rome, where the Federation was founded in 1929. Fifty-seven delegates from 16 countries and four international organizations were present at the meeting. Nineteen reports were read or presented by delegates.

A new factor was two lectures during the opening plenary meeting. Mr. Charles Nowell, Director of the Manchester Public Library, spoke on "Aims and problems of public libraries", and Professor Francesco Severi spoke on "Libraries as an aid to scientific research".

Among the important problems raised during the meeting were those dealing with the necessity for a simplified and if possible uniform request form for international loan, the preservation of ancient manuscripts and rare books by documentary reproduction methods, the protection of libraries and their collections in war time, and cataloguing rules and union catalogues.

The Committee adopted a resolution, proposed by the sub-committee on periodicals and serial publications, drawing the attention of all library and financial authorities to the disastrous change in the economic conditions of most research and scholarly libraries during the last years, owing to the constant rise in prices of books and periodicals, as well as costs of binding and equipment—which have more than doubled—and also to the extension of all fields

of scholarly investigation and scientific research; and demanding increased allowances for books, periodicals and binding, so that libraries will be able to fulfil their task of providing the indispensable information necessary for research, higher learning and scholarship throughout the world.

The same sub-committee's resolution urging the compilation in all countries of selected lists of new national periodicals published was adopted. The French Library Association will lead the way in this respect by compiling a selected list of new French periodicals for the last few years. It will ask the *Unesco Bulletin for Libraries* to publish this list.

In the matter of collecting annual statistics on national book production, the Committee recommended that its sub-committee on statistics of printed materials should, in agreement with publishers and the competent services of Unesco, proceed to establish suggested headings for the different kinds of publications produced, and all countries were to be urged to incorporate these headings in their various national bibliographies. The Committee emphasized the important place held by national bibliographies as a source of publications statistics and urged all countries not now possessing national bibliographies to make all efforts towards their establishment.

Another important resolution recommended that the work of the Joint IFLA-FID Committee on the Professional Education of Librarians and Documentalists should be continued, to enable it to collect further information for publication; that the membership of the Joint Committee should be extended by inviting the participation of the International Council on Archives and the International Council of Museums; that separate training for librarians and documentalists should be introduced where necessary; that mixed schools for the training of teachers of librarianship and documentation should be created in all countries where there are schools for librarians and documentalists; and that Unesco should organize seminars for the study, by those responsible for education of librarians and documentalists, of problems arising in their work.

Other resolutions urged that school teachers who have charge of rural libraries should be given elementary training in library work, and that their schools should be equipped with libraries capable of serving the needs of the rural population.

As part of the statutes of the Federation date from 1929 and no longer conform to present needs, the Executive Bureau will draw up revised statutes which will be distributed to members and discussed at the next session, when the Committee will also study the means of co-operation with other international organizations, in particular the International Council on Archives, the International Federation of Music Libraries and the Association of Librarians of Latin America.

In view of this projected revision of the statutes and the consequent desirability of continuity in the Executive at such a time, it was decided to elect a new president only. Dr. Pierre Bourgeois, Director of the Swiss National Library, was unanimously elected to this office. Mr. W. Munthe, who had held the office for four years, was elected Honorary President.

A resolution on sub-committees' procedure was adopted. Their future reports must be sent to the IFLA secretariat for distribution to members of the sub-committees and member associations at least one month before the annual session of the International Committee; each sub-commitee must meet at least one day before the first plenary meeting of the International Committee.

The Committee accepted an invitation from Denmark to hold its 1952 meeting at Copenhagen.

The reports and papers presented to the Seventeenth Session will be published in volume XVI of the *Acts* of the Committee.

NEWS AND INFORMATION

UNESCO AND INTERNATIONAL NEWS

UNESCO PROGRAMME FOR 1952 FOR THE ESTABLISHMENT OF A UNIVERSAL COPYRIGHT CONVENTION (4)

Since 1947, Unesco has been actively engaged in a project for the establishment of a new Universal Copyright Convention for the protection throughout the world of books, dramatic works, motion pictures and other literary, artistic and scientific works.

Although there are some multilateral copyright conventions now in effect, none have approached the goal of universality; previous attempts to establish a truly world-wide understanding in this field have met with failure for various technical and practical reasons. The Berne Convention, established in 1886, now provides for protection of copyright in 41 countries, mostly European. Brazil and Canada are the only Western Hemisphere countries which adhere to this convention. There are several Pan American conventions among the countries of the Western Hemisphere, the most important of which is the Buenos Aires Convention with 15 adherents.

The new convention will not supersede existing bilateral or multilateral copyright instruments now in effect. Its sole aim is to supplement the present pattern in the field of international copyright law, and to encourage many nations which have heretofore avoided international commitments to subscribe to a new far-reaching instrument which holds the promise of mutual advantage to all.

The United States, although an adherent to the Buenos Aires Convention, has not been in the position to adhere to the more important Berne Convention because the latter provides for international copyright protection without compliance with formalities within the adhering countries. The United States, one of the largest producers and users of intellectual works in the world, has a copyright law which contains strict requirements for formalities, such as registration, deposit of works and payment of a fee.

The Latin American, the Arab and other countries of Asia and Africa remained outside the circle of such international arrangements because of their reluctance to protect the right of translation of foreign works—a great free source of cultural wealth for them.

However, in view of the recent impetus for a greater dissemination of ideas throughout the world in the interests of peace and cultural and economic advancement, a new effort towards the creation of a universal understanding in this field seemed warranted. An attempt has been made to create a new instrument which would reconcile the copyright systems requiring strict compliance with formalities, such as exist in the United States and a few other countries, with those systems in force in large areas of the world where such requirements have been abandoned. At the same time it is designed to encourage adherence by countries which are less advanced culturally, by providing for the protection of translation rights for a very limited period of time.

Thus far, Unesco has convened meetings of committees of copyright experts in 1947, 1949 and 1951. In accordance with the recommendations of the Second Meeting, which met in Paris in 1949, the Director-General of Unesco requested the views of all Governments, whether members of Unesco or not, on the desirability of convening an international conference for the study and adoption of a Universal Copyright Convention. There was a great response to this questionnaire from 44 Governments, which almost unanimously favoured convocation of such an inter-governmental conference. The Third Committee

of Copyright Experts, which met in Washington in 1950, studied these governmental replies and recommended further measures towards the establishment of the new instrument. The principles recommended by this committee were incorporated in a Supplementary Request for Views which was sent to all Governments in January 1951. Replies received from 25 countries served as the basis of the work of Unesco's Fourth Meeting of the Committee of Copyright Experts, which met in Paris in June 1951 as a sub-committee of the Sixth Session of Unesco's General Conference.

The 1951 committtee, composed of 30 international copyright specialists representing 24 countries, prepared a preliminary draft of the Universal Copyright Convention which has been sent to all Governments of the world with a request for their comments.

The preliminary draft and the comments of the Governments will serve as the basis for the work of an international diplomatic conference, which according to present plans will be convened in 1952 for the purpose of preparing and signing the Universal Copyright Convention.

(5) SCIENTIFIC DOCUMENTATION CENTRE IN NEW DELHI

As part of the expanded programme of the United Nations for technical assistance to under-developed areas, an agreement was signed on 7 July 1951 between the Government of India and Unesco stating that Unesco should send to India: an expert on documentation and scientific abstracting; an expert on methods of reproduction by photographic and mechanical means; and an expert for the translation and scientific abstracting service.

This agreement was approved by the Indian Parliament in September and the first expert, head of the mission, took up his post on 15 January 1952.

During 1952 Unesco will supply $24,000 worth of equipment and $12,000 will be spent on periodicals.

Three fellowships will be offered to Indian candidates to travel abroad and study the various techniques of scientific documentation.

(6) ACTIVITIES OF NATIONAL PUBLICATIONS EXCHANGE CENTRES

The Unesco Clearing House for Publications has recently received reports from a number of different kinds of national publications exchange centres, brief summaries of which are given below.

The Clearing House also receives from time to time interesting information on the steps being taken to improve national exchange methods in Unesco Member States, and in future the *Bulletin* will publish news of all such activities of which it is informed. It is hoped that libraries and institutions interested in the improvement of national publications exchanges will send any recommendations and suggestions they may have to their national library, national library association or National Commission for Unesco.

The Unesco Clearing House will be glad to answer all enquiries concerning existing centres and the regulations governing their operation. Much of this information is contained in the *Handbook on the international exchange of publications* which is now available in a bi-lingual English and French edition from Unesco Sales Agents in Member States.

DENMARK

Denmark has a centralized library service, nearly all important research libraries being concentrated in Copenhagen (the State Library at Aarhus being the most important exception), and this facilitated the establishment

in 1945 of the Danmarks Institut for international Udveksling af videnskobelige Publikationer (IDE). The object of the Institute is the centralization and intensification of exchange relations between Danish scientific libraries in other countries.

The IDE receives publications from foreign universities, learned societies, Governments and other official institutions, and distributes them to appropriate libraries in Denmark. The Danish libraries send in their duplicates and other material for exchange to the Institute, but works received in return are not allocated according to the contributions of individual libraries; they are placed according to their contents in the library where they will be of most use to the whole Danish library system.

Arrangements have recently been made for the Unesco Clearing House for Publications to circulate the lists from the IDE after all Danish needs have been satisfied.

FRANCE

The Service des échanges internationaux, 65, rue de Richelieu, Paris, a ministerial service established by the Constitution of 1875 and attached to the Bibliothèque nationale, ensures the exchange of scientific publications between France and other countries. By virtue of recent conventions it has also been instructed to ensure the exchange of official publications with the United States (agreement of 1945, applied since 1947) and with Great Britain. Negotiations are now proceeding with other countries for the development of these activities.

The Service des échanges universitaires, attached to the library of the University of Paris, is entrusted with the distribution of copies of French theses and academic writings within the country (exchanges with the libraries of French universities) as well as abroad (with foreign countries offering something suitable in exchange).

New regulations for this service have recently been drawn up and are contained in the decree of 11 September 1951 (*Journal officiel*, 20 September 1951, p. 9,707). This decree stipulates among other things that "the Service des échanges universitaires is authorized to negotiate with foreign services and establishments for the exchange of collections of theses or dissertations and, if necessary, collections of scientific publications".

Being desirous of actively participating in an international scheme which makes it possible not only to enrich French libraries, but also to promote cultural exchanges between the nations, the "Direction des bibliothèques de France" is at present examining a project for the development of existing relations. This project must take into account especially complex problems raised by legislation now in force.

GERMANY

After an interruption of several years, the Notgemeinschaft der Deutschen Wissenschaft, founded in 1920, began to operate again in 1949. Since then it has gradually assumed the functions of an international centre as laid down by the Brussels Convention of 1866—despatch and receipt of publications offered for exchange or free distribution. It aims at centralizing despatch so as to facilitate packing and transport and reduce costs borne by institutions carrying out the exchanges.

Its activities are continually growing. The number of institutions with which the centre effected exchanges in 1950 was 219, as against 102 in 1949. Many of these exchanges are with Latin American countries. The number of foreign periodicals bought or exchanged rose to 1,971, and many other periodicals and monographs were ordered during the same year.

In addition to these basic activities, the Notgemeinschaft also publishes the *Zentralkatalog der ausländischen Literatur*, a bibliography of foreign publications received in German libraries.

The Notgemeinschaft also serves as a distributing centre for Unesco coupons in Western Germany.

NETHERLANDS

The Netherlands Exchange Bureau (Ruilbureau) comes under the direction of the Royal Library in the Hague. The Bureau is responsible for the despatch of Netherlands publications to libraries and institutions in other countries and the receipt of foreign publications destined for Netherlands institutions. It also deals with the exchange of official publications with national libraries throughout the world. Since 1928 the Bureau has published an annual bibliography of official publications.

During 1950, the Bureau sent 262 crates and 33 parcels, containing 14,041 separate packages of books to 32 different countries, and received 151 crates and nine parcels, containing 14,069 separate packages, from 13 countries. After an interruption of 10 years the Bureau was also able to send books to Japan.

PACIFIC REGION

A regional exchange centre is being established in Honolulu, under the direction of the secretariat of the Pacific Science Council. Its activities will extend to Australia, Fiji, Guam, Hawai, Indochina, Indonesia, Macao, New Caledonia, New Zealand, Papua, the Philippines, Singapore, Thailand, and Western Samoa.

Libraries and institutions in these territories will send to Honolulu lists of duplicates of scientific periodicals published between 1939 and 1945, or earlier, together with lists of works they would like to receive. These lists will first be circulated among scientific institutions in 16 countries in the Pacific region. The centre will ensure that no periodicals are offered to foreign libraries until all the needs of institutions within the Pacific region have been met. Lists of duplicates which still remain will then be sent to Unesco's Clearing House for Publications to be offered to libraries outside the Pacific region.

UNITED KINGDOM

The British National Book Centre, set up by means of a Treasury grant at the instance of the Libraries Co-operating Body in 1947, in order to co-operate with the Unesco Clearing House for Publications, had an extremely busy year in 1950, and it soon became apparent that an increase in funds and staff would be necessary. The centre has a twofold task to perform, combining the recirculation of surplus books among British libraries with the listing of surplus British books and their allocation to libraries in foreign countries, through the Unesco Clearing House for Publications. During 1950 the former function developed more rapidly, with the result that there was a falling-off in the number and comprehensiveness of the lists of books sent by the centre to Unesco. Thus the number of books and periodic parts sent to foreign libraries in 1950 was 8,225 and 3,247 respectively, whereas 16,396 books and 18,923 periodic parts were re-circulated amongst British libraries.

UNITED STATES OF AMERICA

The United States Book Exchange, Inc., whose activities as a centre for both national and international exchange of library duplicates, particularly among

private institutions, have already been described in some detail in the *Bulletin* vols; II, no. 9; III, nos. 3, 4; IV, no. 7/8, V. no. 2), recently issued interesting figures on its work during 1950.

At the beginning of November 1950, 715 libraries and institutions were recorded as members, 466 of these being foreign libraries in 50 different countries. During 1950, the centre allocated 150,000 publications; 80,000 being distributed in America and Canada, and 70,000 in other countries. Foreign institutions sent approximately 70,000 publications to the USBE, and institutions in the United States provided more than three times this number.

The USBE hopes to be able to expand its present exchange and gift programme by increasing its allocation to foreign institutions, and by increasing its membership to include many more foreign libraries and institutions. In some cases, where libraries have material to offer in exchange but cannot pay shipping costs to the United States, the USBE hopes to be able to cover these charges.

MICROFILMS AND MICROCARDS

MICROFILM SERVICES IN POLAND (7)

The *Bulletin* has recently received news of microfilm activities in Poland, one of the countries to which Unesco allocated a complete up-to-date microfilm laboratory in 1949.

A Microfilm Centre was set up in the National Library, Warsaw, in 1950, and in 1951 it issued the first number of *Katalog Mikrofilmów* (Rok 1 zeszyt 1), consisting of 24 pages and listing 235 documents which it has available in positive microfilm or photographic enlargements. The works microfilmed are valuable ancient manuscripts, prints from the sixteenth and seventeenth centuries, and ancient works from the ninth to the eighteenth century in the National Library, Warsaw, the Polish Library of the Academy of Science at Krakow, and the University Library, Warsaw. They are mostly theological works in Latin.

For further details, please write direct to Stacja Mikrofilmowa Biblioteki Narodowej w Waszawie, ul. Okólnik 9, Warsaw.

There is also a Photographic Laboratory in the Muzeum Ziemi (Musée de la Terre), 20/26 al. Na Skarpie, Warsaw, under the direction of Miss J. Bulhak. It undertakes specific tasks—for instance, it has made reproductions of rare Polish geological prints, including microfilms of old and exhausted issues referring to the meteorites dropped on Poland, for the Institute for Nuclear Studies in Chicago. The Laboratory also photographs new palaeontological species for insertion in the Museum's publications, and undertakes the reproduction of geological material for exhibition purposes.

REACTIONS TO THE USE OF MICROCARDS (8)

During 1951 the Navy Research Section (NRS) of the Library of Congress, Washington, in co-operation with the U.S. Office of Naval Research, distributed microcards of the unclassified and restricted documents handled by the NRS. The microcards were sent: *(a)* to agencies and individuals who regularly received the *Technical information pilot* (the NRS' abstract bulletin) and regular catalogue cards (microcards being sent by subject categories to this group); and *(b)* to agencies, for retention, in place of reports that they had requested on loan but for which there were waiting lists.

In answer to an enquiry sent to all recipients, a big majority of both scientists and engineers, librarians and technical information people replied in favour of microcards in general, considered the TIP microcards of great value and wished to continue the service. A large proportion of scientists and librar-

ians indicated that over 90 per cent of their requests for reports on loan could be met as well or better by microcards if promptly dispatched and provided they might be retained. In all cases, scientists and engineers were more in favour of microcards than librarians.

In the second category, of 176 recipients to whom 610 microcards were sent in place of reports on loan, only 10 asked to remain on the waiting list for the loan of reports instead of receiving microcards for retention.

It was found that sending microcards for retention in place of reports on loan permitted a considerable saving in time and money, and although there are certain cases where actual copies of documents are essential, there are many others where microcards are an adequate substitute.

PUBLICATIONS

Under this heading the *Bulletin* mentions new and important bibliographical publications, reference works, recent scientific books and periodicals of special interest. Libraries and publishers are asked to co-operate by supplying us with full details of such publications.

Readers in the countries participating in the Unesco Book Coupon Scheme are reminded that publications reviewed in this section, if obtainable in Belgium, Burma, Ceylon, Czechoslovakia, Egypt, France, the German Bundesrepublik, Hungary, India, Indonesia, Iran, Israel, the Netherlands, Pakistan, Switzerland, Thailand, the Union of South Africa, the United States of America, or Yugoslavia, can be bought with Unesco book coupons.

BIBLIOGRAPHY

(9) Suomalainen Lakimiesyhdistys. *Suomen Lainopillinen Kirjallisuus 1809-1948.* (Bibliographia juridica Fennica 1809-1948). Helsinki, 1951. xxxv and 1,047 pages. 4,730 Finnish marks.

This classified bibliography of the legal literature of Finland during the period 1809-1948 is published by the Association of Finnish Lawyers. It contains titles of over 20,000 books and articles and is the most comprehensive special bibliography which has appeared in Finland. The first part is divided into 26 main chapters representing the different branches of law, each chapter being sub-divided into numerous sections. The second part contains several subject indexes and an alphabetical author index. The bibliography contains directions for use and explanations in French and Swedish.

(10) *Current Caribbean bibliography.* Vol. 1, nos. 1-2, June 1951. Caribbean Commission Central Secretariat, Kent House, Port of Spain, Trinidad, British West Indies. 18 pages.

An alphabetical list of publications issued in the Caribbean territories of France, Great Britain, the Netherlands and the United States of America during 1951. It was issued twice in 1951, and will appear four times a year in future.

The bibliography represents the first attempt to survey these scattered territories collectively, and is an important contribution to the Commission's work of furthering the socio-economic development of these non-self-governing territories through the gathering and dissemination of pertinent information.

All numbers of volume 1 of the bibliography will be sent free to libraries and other institutions on request to the above address.

(11) Gruszecka, Janina. *Wykaz biezacych bibliografii specjalnych w Polsce (1950 R.)* (In *Biuletyn Instytutu Bibliograficznego*, t. 3, no. 3, 1950). Published by Biblioteka Narodowa, Instytut Bibliograficzny, ul. Rakowiecka 6, Warsaw. 2 zlotys.

A useful guide to current subject bibliographies in Poland for the year 1950.

FAO PUBLICATIONS (12)

FAO has just published a joint FAO/IIA catalogue which is available on request to sales agents or FAO in Rome. The International Institute of Agriculture, which was absorbed into FAO in 1946, continued to publish yearbooks, commodity studies, etc., during the war years; many of these were not widely distributed.

FAO also prepares in mimeographed form a series of briefing papers to assist technical assistance experts with regard to a particular region. Some of these papers, such as *A basic bibliography on Islam* and *Select bibliography on modern Egypt* both by Dr. J. Heyworth Dunne, and *Bibliography on pond culture and limnology* by W. H. Schuster, take the form of bibliographies, and will be of interest to many others in addition to technical assistance experts.

For further details, readers should apply to the Publications Officer, Food and Agriculture Organization, Viale delle Terme di Caracalla, Rome.

BIBLIOGRAPHIES FROM THE DOMINICAN REPUBLIC (13)

The following bibliographies published in the Dominican Republic have recently been brought to our notice.

Anuario bibliográfico dominicano 1947. (Sección de canje y difusión cultural de la Secretaría de Estado de Educación y Bellas Artes). Ciudad Trujillo, Luis Sanchez Andujar. 1948. 199 pages.

Lists books, pamphlets, and articles published in the country, or works concerning the country published abroad during 1947. Theses submitted at the University of Santo Domingo for the academic year 1946-1947 are given in an appendix.

Lozano, Luis Florén. *Bibliografía de la bibliografía dominicana*. Ciudad Trujillo, Roques Roman. 1948. 66 pages.

A bibliography of Dominican bibliographies.

The Library of the University of Santo Domingo issues in mimeographed form a series of bibliographical monographs, three of which have been received: *Bibliografía jurídica*, *Bibliografía odontológica*, and *Fuente de información bibliografía de la Biblioteca de la Universidad de Santo Domingo*.

Lozano, Luis Florén. *Guía de las librerías, editores, impresores y vendedores de libros de la República Dominicana*. Ciudad Trujillo, Editora Montalvo. 1951. 32 pages.

This is the first list of libraries, publishers, printers and booksellers in the Dominican Republic to be published in that country. The entries are arranged under towns.

REFERENCE WORKS

Yearbook of international organizations. 1951-1952 edition. Union of International Organizations, Service Centre for International Non-Governmental Organizations, Palais d'Egmont, Brussels, Belgium. 1951. 1,224 pages. $7 or equivalent. (14)

A completely revised and up-to-date edition—giving exhaustive data on over 900 international organizations—the United Nations and its Specialized Agencies, other inter-governmental organizations and international non-governmental organizations, with comprehensive subject, key-word, geographical, etc. indexes in English and French.

Bokstavsignaturer for internasjonale organisasjoner og foreninger. Utenriksdepartementets Bibliotek, Oslo. 1951. ii and 58 pages. Mimeographed. (15)

An alphabetical list of abbreviations of international organizations and

associations. Both English and French names of the organizations are given as well as other abbreviations in general use.

(16) *A directory of dealers in second hand and antiquarian books in the British Isles 1951-1952.* Sheppard Press Ltd., 3 Blackstock road, London, N.4. 1951. 8s.6d. net (postage extra).

This guide to the British second-hand and antiquarian book trade contains detailed information about over 800 dealers. The main list is arranged in geographical areas. There are also alphabetical and full speciality lists, and much valuable general information.

LIBRARIANSHIP

(17) *Actes du Comité international des bibliothèques. 16e session. Londres 15-18 septembre 1950.* Martinus Nijhoff, 9 Lange Voorhout, The Hague, Netherlands. 1951. 148 pages.

Contains the proceedings and reports of the sixteenth session of the International Library Committee of the International Federation of Library Associations, which met in London from 15-18 September 1950.

(18) Overton, C. D. *The gramophone record library.* Grafton and Co., 51 Great Russell street, London, W.C.1. 1951. 123 pages, index. 15s. net.

Designed to assist librarians who propose to install a record collection, this book gives an historical survey of record libraries followed by practical advice on selection of records, record ordering, layout of the department and issue of records, care of records, catalogues and cataloguing of the record department, advantages of a joint music and record department, record library costs, record library co-operation and inter-library loans, and the school record library. Appendices include a list of British periodicals containing record reviews, a suggested basic gramophone record collection for a public library, and a selective bibliography.

(19) Mews, Hazel. *Books are tools; the organization of small technical libraries for South African industry.* Library and Information Division, Council for Scientific and Industrial Research, P.O. Box 395, Pretoria, South Africa. 1951. 28 pages. Illustrated. 2s.6d. (2s.8d. post free).

This is a practical guide to the setting up of individual libraries, particularly by small firms. It deals with all aspects of small technical libraries: functions, accommodation and equipment, finance (initial expenditure and running expenses), techniques, periodicals, microfilms, etc. The booklet also gives an overall picture of technical information services in South Africa. A five-page bibliography of books and pamphlets useful in the settting up of a small industrial library completes the guide.

Although written mainly for the information of South African industry, the contents of this booklet will be most useful to any industrial firm intending to start its own library.

(20) *Die Bibliotheken in Nordrhein-Westfalen. Eine Übersicht über die wissenschaftlichen Bibliotheken, Einheitsbüchereien und Volksbüchereien des Landes.* Published by the Verband der Bibliotheken des Landes Nordrhein-Westfalen. Westdeutscher Verlag, Köln und Opladen, Germany. 1951. 87 pages.

A directory of reference, industrial and public libraries in the region of North Rhine-Westphalia. Libraries of government agencies, university institutes and other libraries not generally open to the public, or of minor scientific importance, are omitted. It contains detailed information about each library, including statistics on collections, number of readers and loans, catalogues, photocopying facilities, etc.

MUSEUMS

The British Museum quarterly. Published by the Trustees of the British Museum, London. Price per part: 3s.6d. plus postage; four successive parts: 14s. post free; five-year subscriptions: £3.10s.0d. post free. (21)

The resumed publication is announced of this illustrated quarterly journal dealing with recent acquisitions and research concerning the British Museum's collections. Vol. XVI, parts I (January 1951) and II have already appeared, and vol. XV, a retrospective single volume for 1941-1950 will be ready shortly.

FUNDAMENTAL EDUCATION

Unesco, 19, avenue Kléber, Paris, France. *The healthy village. An experiment in visual education in West China.* 1951. 119 pages. Illustrated. Obtainable from Unesco Sales Agents. $0.50, 2s.6d. or 125 F. fr. (22)

"The Healthy Village" was chosen as the topic for the experiment which Unesco organized during 1949 in West China for the preparation of a wide range of visual aids and their practical use in fundamental education. The work was done in close collaboration with the Mass Education Movement through its Rural Reconstruction College at Pehpei.

This fifth title in the Unesco series *Monographs on fundamental education* contains the reports on the year's work, written by the Director and the heads of the Field, Health, and Art Departments. They deal with the background, administration, finance, etc. of the project, the application and use of audio-visual materials in the field, health aspects of the project, and descriptions of all the audio-visual materials produced.

FORESTRY

Weltforstatlas. Published by the Bundesanstalt für Forst- und Holzwirtschaft, Reinbek, in collaboration with FAO. Fritz Haller Verlag, Bismarckallee 19, Berlin-Grunewald. Pre-publication price: 10 DM per map (afterwards 14 DM). (23)

The complete World Forestry Atlas will consist of 50 maps (60 × 75 cm) covering all countries of the world and showing the forest area per head of population, the distribution of forest types and wood species, the distribution of wood-working industries and of forest roads. Thirty sheets of statistical tables and graphs will complete the work, which will be finished in 1953. The following four maps have already appeared: Northern Eurasia, Germany, England and France. Maps for Scandinavia (including Finland), Greece and Turkey, and the forest density of Europe will be published shortly. The following are in preparation: Northern and southern part of the European Soviet-Union, Siberia, Baltic States, Yugoslavia, Bulgaria, Austria, Italy, Czechoslovakia, Poland, Hungary, Benelux States, Iberian Peninsula, Denmark, Albania, Switzerland, Africa, India, South-East Asia.

ONOMASTICS

International Committee of Onomastic Sciences. *Onoma. Bibliographical and information bulletin.* Vol. 1, no. 1-2 1950. International Centre of Onomastics, E. van Evenstraat 10, Louvain, Belgium. Volume I (1950): $2. (24)

Published under the auspices of the International Council for Philosophy and Humanistic Studies, this is the official bulletin of the International Centre of Onomastics. Its aim is to provide exhaustive bibliographical information on onomastics, and annual bibliographical lists of publications and important articles in reviews published throughout the world. It will also contain information on the state of research and new initiatives in onomastics, scientific meetings, organization and methods of research, work in progress, appointments, honorary distinctions, etc.

(25) ASLIB CONFERENCE

ASLIB (Association of Special Libraries and Information Bureaux) held its annual conference on 5 and 6 October at Ashorne Hill in Warwickshire, near Stratford-on-Avon. The meeting was attended by nearly 250 people, including a representative of the Libraries Division of Unesco and the members of a mission of European experts on documentary techniques (Mission No. 90 of the Organization for European Economic Co-operation).

The presence of these foreign visitors lent a special international interest to the meeting which was presided over by Mr. C. Le Maistre. Among those who spoke were: Mrs. Ravage, replacing Mr. Carter, Head of the Libraries Division of Unesco, who read his report on the work done by Unesco in organizing bibliographies; Mr. Arne Møller, President of the International Federation for Documentation, who addressed an urgent appeal to ASLIB to rejoin FID; Miss Olga Pinto, head of the documentation service of the Consiglio Nazionale delle Ricerche, who spoke about the World Congress on Documentation, held at Rome a month earlier; and Mr. M. K. F. Løgstad of the University Library of Oslo (a member of the OEEC mission) ,who spoke about Norwegian national bibliography. Mr. F. C. Francis, Curator of the British Museum, concluded the proceedings with cogent observations on the future and role of Unesco's International Advisory Committee on Bibliography, for which he had been the rapporteur at its session in April 1951.

The meeting was followed by a discussion which was evidence of the interest taken by English documentalists in Unesco's work. The following resolution was presented by Miss Barbara Kyle, honorary secretary of ASLIB, and passed unanimously:

"That this Conference welcomes the activity of Unesco, particularly its work of co-ordination and recommends to the Council of ASLIB the fullest co-operation in this work".

The other meetings of the Congress dealt with questions relating to staff (methods of recruitment, division of work, adaptation of staff to their various tasks) and to users (their education; systematic studies with a view to the better use of library resources). At the last meeting five "experts" gave their opinion and comments on questions sent in by members of ASLIB in advance.

(26) NEW JAPANESE PEACE LIBRARY

In memory of the late Mr. Kijuro Shidehara, whose name was closely associated with pacifist democracy in Japan, it is planned to establish the "Shidehara Peace Foundation". One of the main undertakings of the Foundation will be to set up a Peace Library, which will later be transferred to the control of the National Diet Library.

A committee has been formed to select books and build up the Library's special collection, which will deal with peace problems with particular reference to diplomacy in the Far East. The Committee has decided that the library should include works whose topics range from the causes of World War I to the foundation of the United Nations; classics on pacificism; law philosophy; studies on the relationship between world economy and peace. An important place will be given to manuscripts, diaries, memoranda and other documents, private and official, relating to these subjects.

The Division of International Affairs, National Diet Library, Tokyo, would be glad to receive suggestions for the establishment of the library, and recommendations on works that should be included in the collection.

PUBLICATIONS WANTED
PUBLICATIONS DEMANDÉES

All communications concerning the Bulletin *should be addressed to Unesco's Clearing House for Publications, 19 avenue Kléber, Paris-16e, France, marked "Bulletin for Libraries".*

Prière d'adresser toute communication concernant le Bulletin *au Centre de l'Unesco pour l'échange des publications, 19, avenue Kléber, Paris-16e, France, avec la mention « Bulletin à l'intention des bibliothèques ».*

Congressional and finance chronicle, 1848 onwards / et suite.
Schweizerische landwirtschaftliche Monatshefte, Bern-Bümplitz 1945-1949.
Schweizerische Zeitschrift für Volkswirtschaft und Statistik, Basel 1945-1948.
Der schweizer Buchhandel mit Beilage «Das schweizer Buch», série A et B, Zürich 1944-1946.
American journal of sociology, vols. 45-52.
Annuaire administratif et judiciaire de Belgique, 1948-1949.
Annuaire de l'Institut de droit international, Bruxelles 1938-1949.

INSTITUT FÜR EUROPÄISCHE GESCHICHTE, Abteilung Universalgeschichte, Höfchen 5, Mainz.

This institute of European history founded in 1950, is now building up its library and it requests political and historical publications, particularly works published during the last 30 years on English and American history.

Cet Institut d'histoire européenne, fondé en 1950, demande pour la bibliothèque qu'il est en train de constituer des publications politiques et historiques, et en particulier des ouvrages sur l'histoire de l'Angleterre et de l'Amérique parus dans les trente dernières années.

MALAYA / MALAISIE

INSTITUTE FOR MEDICAL RESEARCH, P.O. Box 1905, Kuala Lumpur. (32)

The Institute requests the following numbers of periodicals:

L'institut demande les numéros suivants des périodiques ci-après:

American journal of hygiene, vols. 33-40.
American journal of tropical medicine, vols. 21-26.
The analyst, vols. 66-71.
Annals of tropical medicine and parasitology, vols. 27, 39.
Annales de l'Institut Pasteur, vols. 73, 74.
Archives of dermatology and syphilology, vols. 43-54, 60.
Archives of internal medicine, vols. 67-78.
Archives of pathology, vols. 30-42.
Australian journal of experimental biology and medical science, vols. 9, 20.
Biochemical journal, vol. 37.
British chemical abstracts, A III, B III, C 1948.
British journal of experimental pathology, vols. 21, 23, 24, 27.
British medical journal, 1940 I, 1947 I.
Bulletin de l'Institut Pasteur, vols. 1-5, 25, 46, 47.
Bulletin of the New York academy of medicine, vols. 17-20, 22.
Bulletin de la Société de pathologie exotique, vols. 1, 25-30.
Ceylon journal of science, vol. 5.
Comptes rendus de la Société de biologie, 1945 onwards / et suite.
East African medical journal, vols. 17, 19, 20, 24, 25.
Geneeskundig tijdschrift voor Nedelandsch-Indie, vols. 74-77, 81 onwards / et suite.
Helminthological abstracts, vols. 9, 13.
Indian journal of medical research, vols. 23, 29-32.
Indian medical gazette, vols. 75-81.
International journal of leprosy, vols. 3, 5, 9 onwards / et suite.
Journal of the American medical association, vols. 115-132.

Journal of biological chemistry, vols. 137-140, 154, 157-160, 162-166.
Journal of the chemical society, 1943, 1944.
Journal of comparative pathology and therapeutics, vols. 53-55.
Journal of economic entomology, vols. 34, 36, 37, 39.
Journal of experimental medicine, vols. 89, 90.
Journal of hygiene, vols. 16, 40, 42-44, 46.
Journal of immunology, vols. 41, 43-55.

EXCHANGE
ÉCHANGE

Unless specifically requested to send enquiries to Unesco's Clearing House for Publications, readers should address their applications for material listed in this chapter (accompanied by the titles of books and periodicals they have available in exchange) to libraries or institutions by which it is offered, mentioning the volume, number and page of Unesco Bulletin for Libraries *in which any offer appears.*

Les demandes relatives aux publications énumérées dans ce chapitre (avec les titres des livres et des périodiques offerts à titre d'échange) doivent être envoyées aux adresses indiquées et non au Centre de l'Unesco pour l'échange des publications, sauf mention spéciale. Les lecteurs sont invités à préciser dans chaque cas le volume, le numéro et la page du Bulletin de l'Unesco à l'intention des bibliothèques *où figure l'offre qui les intéresse.*

(33) UNESCO CLEARING HOUSE FOR PUBLICATIONS / CENTRE DE L'UNESCO POUR L'ÉCHANGE DES PUBLICATIONS

The following lists of publications offered for exchange by the countries mentioned are at present being circulated by the Clearing House. Copies can be obtained on request to the Unesco Clearing House for Publications, 19 avenue Kléber, Paris-16e, France. The publications on the following lists will not be allocated until February 1952.

Le Centre pour l'échange des publications distribue actuellement les listes suivantes de publications offertes aux fins d'échange par les pays indiqués. Pour obtenir ces listes, s'adresser au Centre de l'Unesco pour l'échange des publications, 19, avenue Kléber, Paris-16e. France. Les publications indiquées sur les listes suivantes ne seront pas attribuées avant février 1952.

LBA / List / 153, *Pure and applied science / Sciences pures et appliquées* (Indonesia / Indonésie).

LBA / List / 154, *Economics and statistics / Économie politique et statistique* (Canada).

LBA / List / 155, *Veterinary science / Science vétérinaire* (France).

ARGENTINA / ARGENTINE

(34) BIBLIOTECA CENTRAL DE LA UNIVERSIDAD NACIONAL DE CUYO, Rivadavia 125, Mendoza.

The Library offers the following publications in exchange for works on history, geography, arts, sciences, literature, education, etc., from Europe and the United States of America:

La bibliothèque offre d'échanger, contre des ouvrages européens et américains consacrés à l'histoire, à la géographie, aux beaux-arts, aux sciences, à la littérature, à l'éducation, etc., les publications ci-dessous:

Sanchez Albornoz, C. *En torno a los orígenes del feudalismo* (3 vols.).

Horas, Plácido A. *Esteban Echeverría y la filosofía política de la generación de 1837.*

Revista de historia, nos. 1, 2, 1949.

Anales del Instituto de historia y disciplinas auxiliares, vols. IV, V, 1950.

AUSTRIA / AUTRICHE

MEDIZIN.-CHEM. INSTITUT (PHYSIOL.-CHEM. INSTITUT) der Universität Innsbruck, Müllerstrasse 44, Innsbruck.

The Institute requests the following periodicals:

L'institut demande les périodiques suivants:

Chemisches Zentralblatt, Autoren- und Patentregister 1940 für das 1. Halbjahr.

Ergebnisse der Enzymforschung, vol. 9.

Journal of biological chemistry, vols. 10-16 (1911-1913); vol. 136, no. 2 (1940); vol. 160 (1945); index vols. 1-25.

Zeitschrift für angewandte Chemie, vol. 40 (1927) no. 50; vol. 41 (1928), no. 49; vol. 42 (1929), nos. 17, 19, 34, 39.

Monatshefte für Chemie, vols. 59-75 (1932-1945).

It can offer the following periodicals in exchange:

Il offre les périodiques suivants en échange:

Bamann-Myrbäck: Die Methoden der Fermentforschung, 4 vols. (1941).

Chemisches Zentralblatt, vol. III, Autoren- und Patentregister für das 2. Halbjahr 1940; vol. 115 (1944, 2 Halbjahr), no. 5/6; vol. 116 (1945, 1. Halbjahr), nos. 1-10.

Die chemische Fabrik, 1928, nos. 50-52; 1929, all numbers except / tous numéros sauf les numéros 2, 12, 17; 1930; 1931, all numbers except / tous numéros sauf le numéro 21; 1932, nos. 1, 2, 4.

Handbuch der biologischen Arbeitsmethoden (Abderhalden), Abt. II, Teil 2, nos. 1-3 (Lieferung 187, 191, 197), 1926; Abt. IV, Teil 10, no. 6 (Lieferung 227), 1927.
Hoppe-Seylers Zeitschrift für physiologische Chemie, vol. 182 (1945/47); Sach- und Namensregister vols. 1-16 (1881-1893).
Journal of biological chemistry, vol. 130, no. 1 (1939); vol. 131 (1939) 156 (1944).
Merck E.'s Jahresbericht, vols. 52, 53 (1938, 1939).
Vitamins and hormons, vols. 1-5 (1943-1947).
Zeitschrift für angewandte Chemie, vol. 38 (1925), no. 31; vol. 40 (1927), no. 6; vol. 42 (1929), no. 2.

BELGIUM / BELGIQUE

36) INSTITUT DE BACTÉRIOLOGIE DE L'UNIVERSITÉ DE LIÈGE, 1, rue des Bonnes-Villes, Liège.

The Institute requests the following periodicals:

L'institut demande les périodiques suivants:

C.R. Soc. biol., 1929, vol. 101.
Annales Pasteur, 1947, vol. 73, no. 4.
Bulletin Pasteur, 1930, vol. 28, nos. 1, 7, 13.
Zentralblatt für Bakteriologie, Abt. I, Referate, 1914, vol. 61, no. 10.
Proceedings of the Society for experimental biology and medicine, vols. 58-61 (1945-1946).
Journal of immunology, vol. 44 (1942), no. 2; vol. 50 (1945), nos. 5, 6.
Bacteriological reviews, vol. 8 (1944), nos. 1, 2; vol. 9 (1945), no. 1.

It can offer the following duplicates in exchange:

Il peut offrir les doubles suivants en échange:

Journal of hygiene, vol. 20 (1921), no. 4.
Journal of pathology and bacteriology, vol. 58 (1946), no. 1.
British journal of experimental pathology, vol. 15 (1934), no. 1.
Annales de l'Institut Pasteur, vol. 64 (1940) nos. 5, 6.
Comptes rendus de la Société de biologie, vol. 97 (1927), no. 24; vol. 106 (1931), no. 8.

BRAZIL / BRÉSIL

37) SERVIÇO DE ESTATÍSTICA DA PRODUÇÃO, Ministério da Agricultura, Largo da Misericordia, Rio de Janeiro.

The Service offers in exchange for statistical publications and works on economic development in all countries in French, English, Spanish or Italian, its own publications as follows:

BRITISH WEST INDIES / ANTILLES BRITANNIQUES

INSTITUTE OF SOCIAL AND ECONOMIC RESEARCH, University College of the West Indies, Mona, Jamaica.

The Library of the Institute was severely damaged during the recent hurricane which swept the country, most of the periodical collections being almost com-

pletely destroyed. The Institute would therefore be glad to receive the following reviews:

La bibliothèque de l'institut a beaucoup souffert au cours d'un récent cyclone, et ses collections de périodiques ont été presque totalement détruites. L'institut demande les périodiques suivants:

American sociological review.
Annals of the American academy of political science.
Australian social science abstracts.
British journal of sociology.
Bulletin of the Oxford university institute of statistics.
Cambridge journal.
Corona.
Econometrica.
Foreign affairs.
Inter-American economic affairs.
Journal of applied psychology.
Journal of the American statistical association.
Journal of economic history.
Journal of educational sociology.
Journal of Negro migration.
Journal of political economy.
Public opinion quarterly.
Rural sociology.
Social research.

The Institute can offer the following duplications in exchange. It also expects to have its own publications in the near future, which it will be able to offer for exchange.

L'institut offre en échange les doubles ci-dessous. Il compte commencer à faire paraître sous peu diverses publications qu'il offrira également aux fins d'échange.

The farmer (Journal of the Jamaica agricultural society — Revue de la Société d'agriculture de la Jamaïque).
Quarterly digest of statistics.
Working-class cost of living index (for Jamaica / pour la Jamaïque).
External trade bulletin (for Jamaica / pour la Jamaïque).

CARIBBEAN COMMISSION LIBRARY, Kent House, Port-of-Spain, Trinidad.

The Library offers—in exchange for books, monographs and periodicals on agricultural research, agricultural bi-products, industrial uses of agricultural bi-products, economic planning, development of backward areas, and colonial administration, and also historical materials concerning the West Indies from France, the United Kingdom, the Netherlands, Spain, and the United States of America—its own publications:

La bibliothèque offre ses publications, énumérées ci-dessous, en échange de livres, monographies et périodiques consacrés aux recherches agronomiques, aux sous-produits agricoles, aux emplois industriels de ces sous-produits, à la planification économique, au développement des régions peu évoluées et à l'administration coloniale, ou encore en échange de toute documentation historique concernant les Antilles et provenant des pays suivants: France, Royaume-Uni, Pays-Bas, Espagne et États-Unis d'Amérique:

Monthly information bulletin.
Caribbean economic review.
Current Caribbean bibliography (quarterly).
